- Systematic preparation, analysis and updating of all relevant information on players and assets in the sector
- Valid information on each product segment concerning series, fleet sizes, market shares, infrastructures and developments
- Fast and flexible assessment and analysis of key information on the railway industry
- Additional project database on new development and upgrade projects as well as public investment and financing plans

SCI/RAILDATA

- Comprehensive knowledge management system with a user-oriented and systematic overview of the current global railway technology market
- Daily analysis of specialist information from 70 countries in 15 languages
- Publication of the current economic, technical and project data and tenders
- Exclusive access for clients to online database with more than 110,000 articles
- Weekly email newsletter in German and/or English

SCI/RAILINDEX

- warning system for trends relevant to the sector:
 - Early identification of trends relevant to the sector
 - Evaluation of changes to conditions in a national and international context
 - Strategic recommendations for the railway sector
- Survey: a survey is carried out quarterly of the decision makers in the railway industry who, in key positions, steer the fates of their companies and also possess an overview of the situation in the sector.
 - Structure of questionnaire:
 - Evaluation of the current situation of the company
 - Plans and expectations in the next six months
 - Situation in the sector
 - Special questions on the current topics in the railway industry
- Publication on

SCI/LOGISTICS BAROMETER

- Indicator for economic developments in the transport and logistics sector
- Continuous observation of prices and capacities as well as current trends and developments
- Regular survey of 200 decision makers from the sector and analysis of the results using the Ifo business climate index
- Publication of the results in transport newspaper Deutsche Verkehrs-Zeitung (DVZ)

SCI/MULTICLIENT-STUDIES

- Systematic market observation with harmonised view and definition
- Processing of data on current stocks and forecast data, documentation of trends and detailed information on market and sector developments
- Complement available market data and reduce clients' need to compile their own data
- Basis for decisions and information for the development of individual consulting requirements
- Available in German and English

SCI/MARKET FORECASTS

- A standardised depiction of the current and future market volumes for products and services in the railway market
- The foundation for fact-based consulting and therefore complementary to qualitative trend statements and top-down analyses
- Attractive basis for decisions for strategic recommendations as trends and market developments can be recognised early on and backed up with concrete numerical data
- Based on actual projects in the vehicle and infrastructure market, integrating medium- and long-term development drivers in the national and transport markets
- Achieve a high-quality result thanks to the combination of top-down and bottom-up analyses in the form of continuous market observation and validation of the results

SCI/MARKETMONITORING

- Knowledge & Transparency more than 1,000 rolling stock projects up to the year 2025
- Speed & Precision Early market overview, world-wide scanning and continuous online-access on the internet
- Individuality & Flexibility Client-specific adaption of the database
- Control & Security Fast communication, privacy and high security standards
- Simplicity & High performance
- Simple interfaces and easy handling
- Efficiency & Cost awareness Increasing efficiency of market analyses as well as distribution activities
