

SCI RAILDATA

Up-to-date Market Knowledge

(Market)Knowledge is power – this also applies to the rail industry. With RAILDATA, SCI Verkehr has developed a knowledge base since 1997, in which almost 100,000 compressed messages and items of information from the international rail network have been collected. Now we start with an English version of this SCI Raildata Newsletter. It contains the latest version of the rail transport industry relating to market, technology and economics from all over the world. Information relevant to business from the daily and specialist press, current invitations to tenders in the EU countries, as well as business reports of the industry are evaluated here.

With this knowledge base, SCI Verkehr doesn't offer merely competent consulting services: SCI Verkehr goes one step further and shares this unique knowledge with its customers.

- Subscribers to RAILDATA receive a weekly e-mail-newsletter with current information on the world's rail markets including the latest invitations to tender.
- In addition to this, our customers receive exclusive access to the online database RAILDATA. In the form of a comfortable full-text search, current and past messages can be found quickly and easily. Advice on important specialist articles can be found, quoting the exact source.

The English version of the RAILDATA is available at the price of € 2,000 plus VAT, for a period of 12 months.
